**Executive Director - Academics and Administration -  
Nehru Group of Institutions**

Dear Stakeholders,

Nehru Group of institutions has a strong legacy of more than five decades in the states of Tamil Nadu and Kerala, by one of the great leaders, an educationist, a philanthropist Late Shri. P.K. Das. The sole intention of establishing these institutions is to help the needy and the aspiring people of Tamil Nadu and Kerala who are deprived of professional education.

Darwin's theory of struggle for existence and survival of the fittest is the mantra very well suited for the education sector at present. In order to overcome the competition among many elite educational institutions, imparting of quality education to future citizens to build a strong nation with the development of villages and towns in all the basic sectors is very much required. Nehru Group of Institutions, right from its inception is working in this direction through its qualified, experienced, dedicated and committed faculty and staff members. Thus, relentless work in the right direction by all the stakeholders with very strong ethical background has led to the existence of more than 20+ educational institutions starting from International school to professional colleges like, Engineering, Aeronautical, Law, Architecture, Arts & Science, Humanities & health sciences, Paramedical and Medical Sciences. Most of the institution and programmes are accredited by NAAC and NBA. Some of them have even got the Autonomous status by UGC.

Our primary goal is to establish center of excellence laboratories to tap the hidden talents of the young budding Engineers / Managers / Executives / Scientists / Bureaucrats etc., to showcase in the form of startups and entrepreneurship. This institute aims to become a research university contributing a great deal of services in Agriculture, Space, Automobile, Health and IT sector at both local & global level. The entire NGI family is working round the clock to leave any stone unturned in creating a strong students community which can help the country in making Vishwa Guru in every sector.

NGI is aiming to impart multidisciplinary education by incorporating critical thinking, analytical and creative courses with experiential learning for carving & shaping the students into polished pebbles or trimmed diamonds depending upon their ability. NGI aims to impart ethical education to make aware about human values to the society. NEP 2020 shall be incorporated in phased manner so as to make students ready in 360 degrees. We are sure that, in the near future the institutions of Nehru group will create history in most of the sector by fulfilling the students and parents dreams into reality.

Prof. Dr. H. N. Nagaraja
