

JAZETTE

JCET NEWSLETTER

“No Matter What Life Throws at You, You Can Still Fight Back, You Can Still Choose to Be Happy, You Can Still Be Successful, You Can Still Reach Where You Always Wanted to Go, You Can Still Make it Better for Yourself and Others”

Editorial...

Nature teaches us many things. In addition to learning from books, students shall learn through close observation of the nature which surrounds us. For example, butterflies have born out of struggles in different stages lives a day. They die if somebody tries to pull it out of its cover any time. Birds nest is an example of a beautiful design that nature provides us. No finite element method could make a birds nest as they build it. A big jack fruit hangs in a stalk attached to a trunk. The fibre in the stalk is so strong compared to any other fibre. Somebody needs to have a look at what makes them very strong fibre in a stalk so that they could make a fibre for withstanding heavy loads. Engineers visit flora and fauna in order to make their design better than before. Wish you all a great observation skill with this edition of Jazette Newsletter for the month of October 2023.

NSITE 2K23

Poster Release of the much awaited Technical Fest - **NSITE 2K23**

WHAT'S INSIDE

- NATIONAL / STATE EVENTS
